

1. Getting Started

Create your free account to begin.

- Navigate to **evisynt.com** and click **Sign Up**.
- You can create a username/password or log in instantly using your existing **Google** or **LinkedIn** accounts.
- *Note: EviSynth is completely free for academic use. No trials or subscriptions.*

2. Create a Project

Set up your review protocol.

- Go to the **Projects** dashboard and click "**New Project**".
- Enter your Review Title and Description.
- Define your **PICO(ST)** elements to keep your team aligned.
- **Invite Collaborators:** Add email addresses in project settings to work together.

3. Import Articles

Centralize your references.

- Navigate to the **Articles** tab within your project.
- Click **Import** to upload references (EndNote XML or PubMed NBIB).
- *Tip: Imports process in the background so you can keep working.*

4. Screen Articles

Mobile-native screening with AI assistance.

- **Make Decisions:** Click **Include**, **Exclude**, or **Unsure**.
- **Use AI Insights:** Click **AI Analysis** to get summaries and bias alerts.
- **Mobile Friendly:** The interface is designed for touch on phones/tablets.

5. Assess Risk of Bias

Evaluate the quality of included studies.

- Move to the **Assess** tab after articles are included.
- Select a standard assessment tool (e.g., ROBINS-I).
- Record your judgments to determine study quality.

6. Learn & Support

- **Tutorials:** Visit the **Resources** menu for step-by-step guides.
- **Feedback:** Use the **Feedback** tool to suggest improvements.

Pro Tips

- **Ask the AI:** Type questions into the AI chat box for clarification on complex abstracts.
- **Track Progress:** Check the Dashboard for live screening statistics.
- **Collaborate:** Screen simultaneously with colleagues without duplicating work.
